

Some Activities at Vardaan Senior Citizen Centre

Bajpayee Ji is a retired engineer and lives with his daughter. When he visited us in one of the camps organized by us, we found that he had uncontrolled high blood pressure. Not wanting to spend money on himself, he was silently suffering. He did not want charity so we looked after his health needs and occasionally take his help in paper work. This arrangement is working well and he is enjoying good health....

On Women's Day we got a senior citizen who lives alone with her epileptic son. She lost a lot of blood because of severe nose bleed and was administered blood transfusion. Now she is all set to go home after her short stay!

Celebrating Diwali with Senior Citizens
